

RE: New Standard Format for Separation Information Exchange

The State Information Data Exchange System (SIDES) will be implementing changes for the Separation Information Exchange. Employers will experience a total outage of the site on March 16, 2016, while they confirm system operations. Changes will include varied date restrictions which will apply to the following questions:

- What was the claimant's first day of work?
- What was the claimant's last day of work?
- What was the date claimant was separated from employment, if it was different from the last day of work?
- What date do you expect the claimant to return to work?
- What is the date the remuneration was or will be issued?
- What was the beginning date for the remuneration allocation?
- What was the ending date for the remuneration allocation?
- What was the date of the final incident?
- What was the date the claimant violated a rule, behaved unacceptably, was absent or late prior to the final incident?
- What was the date of the prior incident warning?
